Clean and Relaxing Environment

We pride ourselves on our training facilities and strive to make your time with us enjoyable.

WHAT WILL I LEARN:

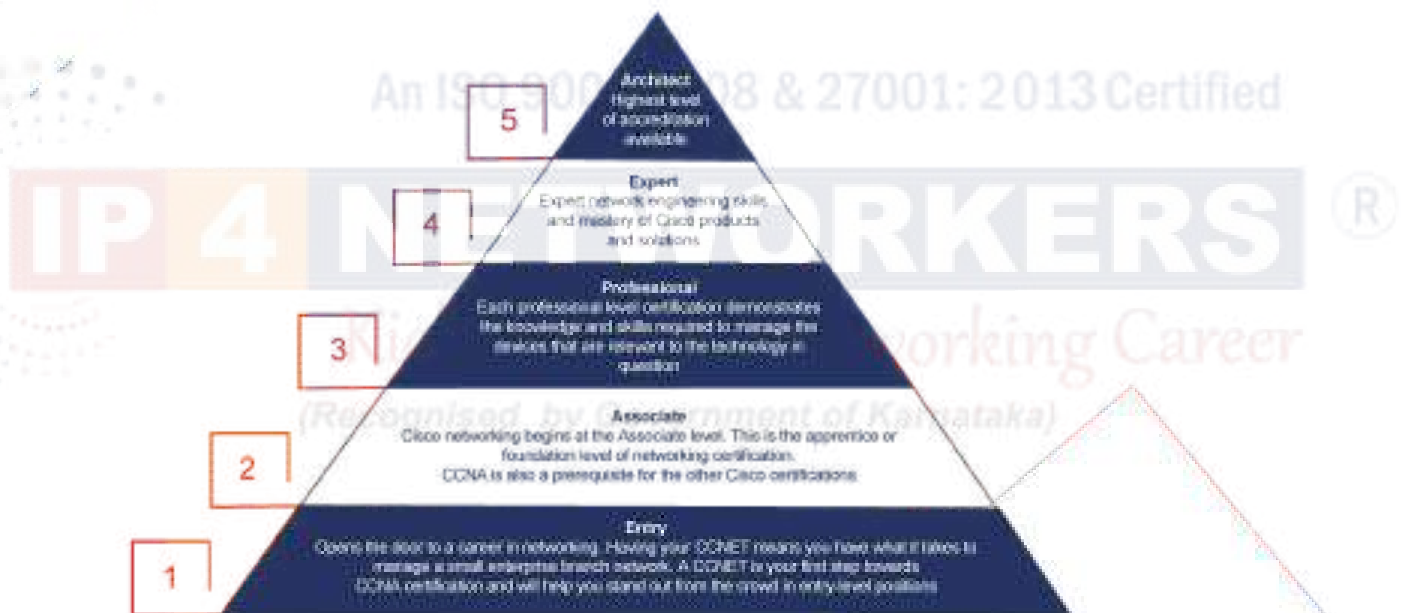

When you become a IP 4 Networkers Student, then you are not only entering a world of theory but would be a mind of practical as well. The curriculum cover broad range of topics, from crimping cables to building a network for small and mid-size companies & and to do troubleshooting.

In addition to these skills the Courses will also help you in critical thinking, problem solving, interviewing & Career Planning.

The Combination of Lectures, case studies and practical hands-on lab exercise ensures an understanding of the skills needed for the networking industry.

THESE COURSES HAVE MANY BENEFITS:

- a) **Direct route to Industry - Global Certification:** - These programs will prepare you for industry after global certification. Global certifications are viewed as a valid measure for assessing skills and assure an employer that the certified individual is unified performer on the job. These include CCNA, CCNP CCIE Certification from CISCO.

- b) **Study based on the latest internet Technology:** - As the networkers', labs always contain up-to-the minute equipment, you learn on the actual equipment you will be working on in the business environment. This gives you the opportunity to develop troubleshooting skills as well as strengthen critical thinking and problem solving. You will be prepared for Knowledge and skills for technologies like IPv6, BGP & MPLS, F5 Load Balancing, VPN, Multicasting and QoS.
